

Opening JMP® and Getting Started

This guide provides instructions on creating a new data table, opening data tables, and finding help within JMP.

Opening JMP

- When you first open JMP, you'll see the **Tip of the Day** and the **JMP Home** windows. On Mac you'll also see the **JMP Starter** window.
 - Tip of the Day gives helpful hints on using JMP.
 - The JMP Home Window displays recently used files and open data tables and windows. See the page **"Navigating JMP in Windows"** for Windows-specific information.
 - The **JMP Starter** window (click on **View > JMP Starter** on Windows, including opening files and accessing JMP analyses.
- The JMP menus, across the top, can be used to perform JMP functions.
- The JMP toolbar, located beneath the menu bar, provides many shortcuts and helpful tools.

Creating a New JMP Data Table

Click on **File > New > Data Table** or select **New Data Table** from the **JMP Starter**.

Opening a JMP Data Table

- Click on **File > Open**, or click on **Open** from the **JMP Starter** window. Navigate to the directory where your JMP, Excel or other files are stored.
- Click on the file name and click **Open**.

Getting Help

The **Help** menu provides many resources to help you get started:

- Searchable documentation (JMP Help and Books),
- A summary of new features,
- Tutorials,
- Sample Data,
- Indexes of statistical terms and JMP scripting functions, and more.
