The JMP® Family of Products

Which statistical discovery software is right for you?

SAS created JMP data analysis software to empower scientists and engineers to explore data visually.

JMP has grown into a family of statistical analysis tools, each one tailored to meet specific needs.

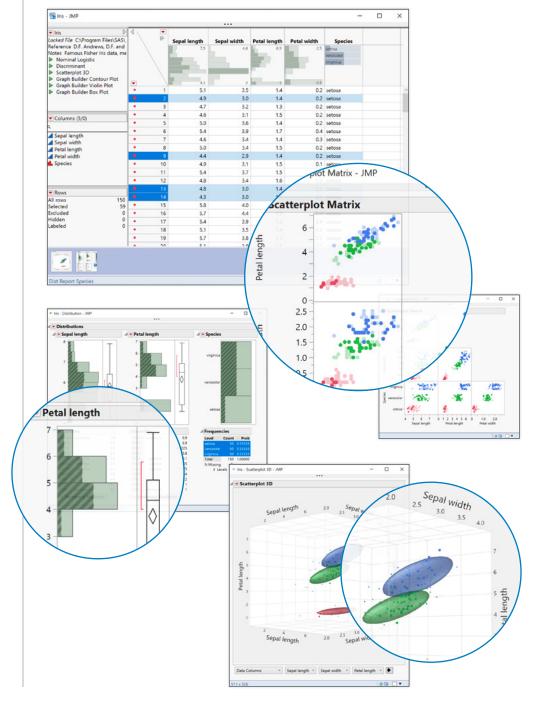

jmp.com/software

JMP[®]

JMP links interactive data visualization with powerful statistics, in memory and on the desktop. The original statistical discovery software from SAS helps you explore your data and easily share your findings.

jmp.com/jmp

JMP® LIVE

JMP Live allows JMP users to share their discoveries to a private site for interactive collaboration in a web browser.

JMP® CLINICAL

JMP Clinical enables more insightful analyses in the safety, efficacy and quality of clinical trials. **jmp.com/clinical**

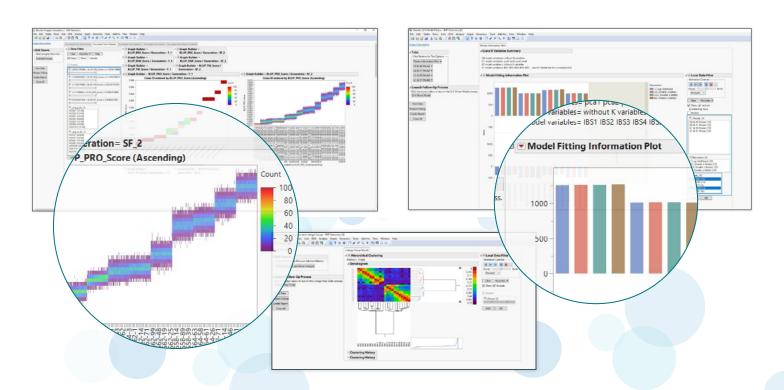

JMP® GENOMICS

JMP Genomics allows researchers to visualize, explore and predict patterns in DNA variant, RNA sequencing and other genomics data experiments.
